

Building Metal Stamping Dies Since 1965

For over 55 years RTD has produced complex metal stamping dies that are designed, developed, and built in our 52,000 sq/ft facility.

Engineering Changes

- 3D Design Using SolidWorks/LogoPress
- AutoCAD

Replacement Components

Die Repair

- Die Maintenance
- Routine Sharpening
- Emergency Repair

Machining Capabilities

New Tool Builds
• Progressive Dies

Transfer DiesCompound Dies

Form Tooling

- Over (25) Machining Centers (Max Plate size is 50" x 116")
- (4) Wire EDM's max travel is (31" x 23" x 20")
- Waterjet cutting max part size is (72" x 144")

3 Tryout Presses

- 400 Ton (48" x 102" bed)
- 250 Ton (48" x 84" bed)
- 150 Ton (30" x 50" bed)
- *For larger dies we have close relationships with stampers*

Sample Parts From Dies Built by Reich Tool

Industries Served

Appliance • Home Products • Lighting • Lawn & Garden
 Firearms • Heavy Truck • Automotive
